

On Site Screening Results

(Hot Sheet)

CF/H-7c Revised 1/17

(optional)

The On Site Screening Results form is used to document the vision and hearing tests that are performed by the Head Start Nurse or designated health staff by child's name and facility site.

The form is kept at the facility (Screening Results File) and will be updated as children are screened and/or re-screened. If the child does not pass either the vision or hearing test, the nurse or designated health staff will make the appropriate referrals. Each on-site screen will be updated in the data management tracking system.
