

Medication Box Labels

(Hot Sheet)

CF/H-8d Revised 1/11
(mandatory)

Medication Box Labels are to be placed on the medication box that holds childrens' medication at the Centers or Family Child Care Homes. Upon receipt of medication from the parent or guardian (with appropriate physician instructions in writing), the child's name, medications at center or FCCH and diagnosis requiring medication will be listed on the label by center/FCCH staff. Any food/medication allergies will also be listed. Once the label is complete, it will be placed on or in the medication box for easy reference. The label will be removed or updated as medication needs change for the child.
